

STAFF TRAINING & QUALIFICATIONS

Even in the recession we continue with our training plan, with many members of staff having recently completed courses and others currently undertaking further courses. Here are just a few:

Our Health & Safety Manager and our Training Assessor have recently gained their NEBOSH Qualification in Construction.

Two of our Carpentry Apprentices have completed their NVQ Level 2 with a further three still progressing well on the course. We also have three members of our Administration staff who have completed their NVQs in Business Administration.

Four of our Technical Trainees successfully completed their BTEC Higher National Certificate in Construction with commendation, whilst two others continue to attend College.

One of our Directors has recently become a Code for Sustainable Homes Assessor and an On Construction Domestic Energy Assessor and is currently studying for his Non-Domestic Energy Assessor qualification.

Also we are in the process of being accredited for ITSSR (Independent Training Standards Scheme and Register) with a number of staff members taking A1 Assessor Qualifications.

WESTRIDGE BUILDING IN THE COMMUNITY

In November we attended the formal re-opening of Bexhill Museum following completion of the works. After a tour of the building conducted by the Curator, Julian Porter, guests gathered outside to see Eddie Izzard finish his half marathon run from Eastbourne to cut the ribbon. The event was a great success receiving local and national press coverage.

A member of our Buying Team dressed up as 'Jim The Joiner' to greet the children at a turf turning ceremony at Langley Green, Crawley in October. The local Mayor and MPs were present to celebrate the start of this £2,150,000 project constructing a new Children's Centre for the local community.
