- Education
- Healthcare
- Marine
- Affordable Housing

WHERE WE WORK & ACCREDITATIONS

LATEST NEWS

In July we entered a team in the Annual Raft Race in Rye, East Sussex. Although we stayed afloat, we didn't come anywhere close to winning, however we did raise nearly £300 for the Rye Lions who help people with special needs.

Keeping with the local community, last year we continued to sponsor Heathfield and Waldron Rugby Club along with Hastings and Bexhill RFC, both who continue to do exceedingly well.

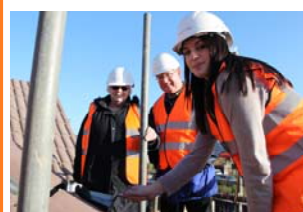

The Company was also pleased to donate a prize for the MacMillan Coffee Morning arranged through our current site at the Gallard Almshouses in Southborough.

The second half of 2011 saw many Brighton and Hove Framework projects completing and we participated in a number of Opening Ceremonies including events at Hillside School, Whitehawk Discovery Centre and Connaught School.

In December the topping out ceremony took place at Orion Way, a design and build housing project for Ashford Council comprising seven 3 bedroom homes and two 4 bedroom wheelchair friendly homes all built to Code for Sustainable Homes Level 4 standard.

The ceremony was performed by Leanne Matthews who will be moving into one of the bespoke wheelchair friendly homes with her husband Daniel and their daughter Tia; the property has been designed around Tia's needs with space for her mobility aids and equipment.

The development is part of the Local Authority's New Build Programme, which includes some of the first affordable homes the Council has built in 25 years.

Councillor Aline Hicks said "These bespoke properties were built around the specific family needs and importantly they have been able to work alongside Occupational Therapists Council Officers and Westridge to ensure they are right for them"

Westridge Construction has been awarded a contract by East Hampshire District Council for the construction of an Eco Exhibition House (Code For Sustainable Homes Level 6) and Eco Station at Whitehill, Bordon, the proposed location of one of the new Eco Towns.

The exhibition home will be built in the grounds of the disused MoD Fire Station, which has been bought by East Hampshire District Council to convert into a community and training facility called the Eco Station.

The Eco Station will provide community and training facilities as well as being a base for information about the Eco Town and how residents can benefit from it.

TRAINING

Following re-assessment, we have received ITSSAR re-accreditation enabling us to deliver plant training to our staff and our supply chain. This is in addition to various safety, management and specific CPD training being undertaken throughout the business for all staff enhancing our employees' skills to the benefit of all our Clients.

For further information or an informal discussion please contact Alec Rollings, Laura Harffey or John Cudd
